EDUCATION

University of Texas at Austin	Major in Computer Science Minors in Statistics & Data Science, Chinese	Present — Expected May 2028
-------------------------------	---	-----------------------------

WORK EXPERIENCE

ServiceNow

May 2026 — July 2026

Software Engineering Intern — Dev-CI-Channels Team

- Built the **admin configuration experience** for **Virtual Agent** integrations across Teams, Google Chat, and Slack
- Delivered a **UI rebrand** across multiple product repos and release trains, backed by **Jest** and **Java** test coverage
- Fixed a **cross-scope permission** failure in a production business rule by moving **OAuth** access into a scoped **Script Include**
- Owned **regression testing** for a Microsoft Teams virtual assistant, building **Playwright** and **ATF** suites plus test environments from scratch

Keysight Technologies

January 2026 — May 2026

Software Engineering Intern — AI Tooling & Test Automation

- Built a **RAG** assistant that answers developers' test-planning questions from internal docs via **ChromaDB** embeddings and **FastAPI**
- Wrote an **MCP server** (FastMCP) that surfaces the assistant inside **GitHub Copilot** and **OpenCode** with source citations
- Automated lab hardware inventory with a **Python scanner** that probes subnets and fingerprints devices over **REST** and **SOAP** APIs
- Packaged it as a standalone **cross-platform executable** with **PyInstaller**, configurable credentials, and legacy TLS support

Driven Telematics

April 2025 — April 2026

Summer and Part-Time Intern

- Built a **telemetry ingestion** and retrieval service on **AWS API Gateway** and **Lambda** within an **Agile** delivery team
- Implemented a **REST API** querying multiple **Kinesis Firehose** streams in parallel with **sub-second** response times
- Designed the **PostgreSQL** schema on **Aurora** and containerized deployments with **Docker** for environment consistency
- Instrumented **CloudWatch** and **S3** logging to give **100% request traceability** across every data flow

PROJECTS

Homegrown

January 2026 — May 2026

Cofounder — Local Produce Marketplace App (Convergent Incubator)

- Built the full Stripe payment flow with the **Stripe API**, handling **checkout**, **order records**, and **seller transactions**
- Shipped listings, messaging, and comments in **React Native** on a **Supabase** backend, with a full **UI redesign**
- Ran **user testing** at local **farmers markets** and presented the product, driving a target-audience pivot and seller waitlist growth

Custom Search Engine

March 2024 — May 2024

Web Search Platform with Intelligent Page Ranking and Recursive Content Indexing

- Wrote a **page scorer**, **recursive web crawler**, and **query interface** that indexed and ranked **1,000+ pages**
- Deployed the interface on **Node.js** and **Express** with **Axios** and **Cheerio** scraping, **regex** ranking, and an **automated JS test harness**

LEADERSHIP & COMMUNITY INVOLVEMENT

CS Honor Society & Technology Student Association — Co-Founder, President (2x), VP (2x)

August 2021 — May 2025

Two 200+ member organizations promoting academic excellence and technology competition in Computer Science

- **Co-founded** CS Honor Society and grew it to **200+ members**, hosting 50+ tutorials and tournaments for **450+ participants**
- Led TSA to **2nd in state** and **4th nationally** in Webmaster, growing membership **200%** and managing a **\$50,000+** budget

Convergent — Tech Lead & Operations Chair

August 2026 — Present

A student organization running a startup incubator and semester-long technical build-team program

- Lead **build teams** through a semester-long **product development curriculum**, coaching members on coding practices and **AI tooling**
- Plan and execute **club**, **alumni**, and **sponsor events** with Board, coordinating partners, **logistics**, and day-of officer responsibilities

SKILLS

Technical Skills: Java, Python, JavaScript/TypeScript, Node.js, React/Next.js, React Native, Svelte, FastAPI, REST APIs, PostgreSQL, MongoDB, Firebase, Supabase, AWS, Docker, CI/CD, Git, Playwright/Jest, TensorFlow, PyTorch, RAG/LLM Integration

Languages: Native Spanish Speaker and Writer, Mandarin Chinese: Elementary (HSK Level 2)

Relevant Coursework: Calculus I-III, Linear Algebra, Data Structures, Discrete Math, Cloud Computing, Cybersecurity, Computer Architecture, Operating Systems, Networking

Certifications: Unity Certification and AWS Foundations & Practitioner Certification

Interests: Ultimate Frisbee, Rock Climbing, Music, Coffee Shops, Messing Around with Siblings and Friends, Making Bad Jokes
